No	Item	Qty	Price	Total
1	RS232 Converte	1	2000000	2000000

we found that server resources were underutilized due to numerous program additions and modifications without checking for coding efficiency.

No	Problem	Desc	Solutions	Limitation	Duration (hours)
1	Pallet system	Found 1 function that loop the database more than 80,000,000 times in every 1 minute	Update pallet background process execution method		20
2	Cron	There are 60 functions that run in background	Performance check, all function will be tested to check overall timing. This process need a temporary stop for 3 hours		30
3	All table pagging	All table use total row query to do pagging, which slowdown the database	change to datatable with ajax request by limit	Will apply to heaviest table that takes more than 10s to loads, since there are hundreds table that need to check and modify	25
4	Telegram connection	Some system send data to telegram to inform user	Each module run in different function which cause some rejection		15
TOTAL					90
Days					18

We only listed down top priorities based on CPU usage of SQL

No	Item	Qty	Price	Total
1	IoT Server Remote Maintenance	90	100000	9000000

Total. Rp. 11.000.000,-
